

ANF II

RELEASE NOTE

Operational system: WinXP/2003/2008/Vista/Win7/Linux

Date: 20.02.2012

Firmware version: 2.1.51

New capabilities:

- OS Win8 32/64 bit support
- Simultaneous recording of bypass and processed channel
- Recording file length limit – 15 minutes

New parameters:

Rate of intermodulation by the sound recording through line input (in 24 bit format without the compression) with 1000 Hz frequency nominal level, % no more than	0,02
Rate of intermodulation by the sound recording through microphone input (in 24 bit format without the compression) with 1000 Hz frequency nominal level, % no more than	0,05
SNR (signal-to-noise-ratio) by the sound recording through line input (in 24 format without the compression at a sampling rate 44 kHz) with 1000 Hz frequency nominal level, dB, no less than	105
SNR (signal-to-noise-ratio) by the sound recording through microphone input (in format without the compression at a sampling rate 44 kHz) with 1000 Hz frequency nominal level, dB, no less than	85
Dynamic range of the recording signals (in format without the compression), dB, no less than	100
Rate of intermodulation by the sound recording through line input (in format without the compression) with 1000 Hz frequency nominal level, at a load of 20 kOhms % no more than	0,02
SNR (signal-to-noise-ratio) by the sound recording through line input (in 24 format without the compression at a sampling rate 44 kHz) with 1000 Hz frequency nominal level, dB, no less than at a load of 20 kOhms, in the frequency range 20 Hz-22.05 kHz, dB, not less	106

Weight, without batteries	1350 g
Product dimensions	213x139x76 mm
Running time in recording mode	minimum 2 with alkaline batteries, minimum 6 with lithium batteries
Power consumption (in recording mode)	5 W
